

## A B S T R A C T

5 A method of adjusting transmission power for base  
stations transmitting in macro-diversity in a mobile  
radiocommunications system, wherein a reference  
transmission power for said adjustment is signalled to  
each of said base stations together with an adjustment  
period, and wherein each of said base stations  
periodically adjusts its transmission power to said  
10 reference transmission power, at said adjustment period.
